Appendix C – Book Level Equivalencies

There are a variety of systems used for designating book levels. Our books are labeled with the “Guided Reading” system of letters. These are in the first column. The MCP books we use are labeled with numbers that are less finely categorized. You can read across the columns for equivalent levels. So a level C book is a MCP level 1 book and it is also a beginning first grade level book. You should know that these ratings are *not* perfect: There is variability even among those with the same designation.
