HAVE YOU OR A CLOSE CONTACT TESTED POSITIVE FOR COVID-19?

While you wait for the university to reach out to you, please contact your Resident Director or Graduate Life Office Dean. Click on the QR code above to learn more on what you can do during this time.

UNDERGRADUATES:
Contact your Resident Director 650.505.3682

GRADUATE OR PROFESSIONAL STUDENTS:
Contact the Graduate Life Office 650.723.7288 Pager ID #25085

Indicate that you need to reach the graduate dean-on-call.

If you need immediate medical advice, call Vaden Medical Services at 650.498.2336

Should I notify others I am positive?

Yes. If you are comfortable doing so, let others know about your positive test result as soon as possible. Identify and make a list of your high-risk close contacts.

- Think about who you came into contact with, starting 2 days before you received your positive COVID-19 test result or developed symptoms
- Vaden will try to reach out to all high-risk close contacts and provide customized information and support
- Other contacts you provide will receive a general notification

HIGH-RISK CLOSE CONTACT

You are considered a high-risk close contact if you have been indoors, unmasked and prolonged exposure (15 minutes, can be cumulative over time) to a positive case.

HIGH-RISK & fully vaccinated for COVID-19:

- You do not need quarantine housing at this time, but it is important to minimize your exposure to others
- Submit a Color COVID-19 test immediately
- Test again 3-5 days after your last exposure to the positive person
- Test again 8 days after your last exposure to the positive person
- First 3-5 days: get grab-and-go meals at the dining hall, do not go to class, contact your academic advisor to request academic support, avoid any unmasked contact with others, and maintain proper physical distancing
- After a negative 3-5 day test, you can resume classes and other activities
- If you develop symptoms at any point, submit a Color test immediately and follow the instructions for a symptomatic person

HIGH-RISK & NOT fully vaccinated for COVID-19:

- Contact Vaden Medical Services at 650.498.2336 to notify our health care professionals
- Rest in your room, keep away from others, and wear a face covering around roommates, apartment mates, and family
- Do not go to the dining hall, classes, and indoor gatherings
- Contact your Resident Director or the Graduate Life Office between 8 a.m. and 9:45 p.m. daily to discuss isolation housing and meal support. Students may be moved up until 10 p.m. each evening.
- Prepare to move to a temporary isolation space
- Not everyone is moved
- Submit a Color COVID-19 test immediately
- Test again 3-5 days after your last exposure to the positive person
- Test again 8 days after your last exposure to the positive person

LOWER-RISK CLOSE CONTACT

A lower-risk close contact is someone who has been in contact with a positive COVID-19 case indoors or outdoors with face coverings, or outdoors without face coverings but distanced.

All LOWER-RISK CLOSE CONTACTS who receive an exposure notification, whether vaccinated or not should:

1. Submit a Color COVID-19 test immediately
2. Then follow your normal testing cadence

What if I have COVID-19 symptoms?

- Take a Color test immediately
- While waiting for your test results, call Vaden Medical Services at 650.498.2336 if you need immediate medical advice
- Keep away from others, and wear a face covering around roommates, apartment mates, and family members
- Do not go into the dining hall, classes, and indoor gatherings
- Rest in your room
- Request academic support if needed via your Undergraduate Advising Director or, for grad and professional students, your program’s student services staff person, faculty advisor, or director of grad studies
- Prepare to move to a temporary isolation space
- Not everyone is moved
