COVID-19 Testing Checklist for Undergraduate Students

Winter 2021

1. **Today**, order a pre-arrival test. Go to this [Binx website](https://app.mybinxhealth.com/covid), click “check availability,” complete the questionnaire, and then complete the checkout process with the coupon code that Stanford emailed you.

2. **Eight days before you arrive on campus**, take the Binx pre-arrival test and return your sample via the provided pre-paid UPS envelope.

3. **Seven days before you arrive on campus** from the United States or abroad, register for your first twice weekly test. Go to the [Verily website](https://healthy.verily.com/), create an account, and when prompted for your home address, enter “Stanford University, Stanford, Calif., 94305.” Make an appointment for one hour after your residence check-in time. If you are checking in after 1 p.m., make an appointment for the next day.

4. **The morning of the day you arrive on campus**, complete the Stanford [Health Check](https://healthcheck.stanford.edu/login). Set an alarm on your phone so that you remember to do this every day while you are living on campus.

5. **When you arrive on campus**, take a Stanford Health Care test at your dorm check-in location.

6. **AND, if you arrive before 1 p.m.**, leave your luggage at your dorm and then go to Tresidder Memorial Union to take your first test with Verily at your appointment time. Bring your student or government issued ID. **OR, if you arrive after 1 p.m.**, spend the night in your dorm room and then go to Tresidder Memorial Union the next day.

7. **24 hours after your first test with Verily**, make an appointment for your next test. Important! Make one appointment at a time. If you make a second one, your first appointment will be canceled. And if you can’t go to your appointment, cancel it with Verily. This way, we can offer the spot to other students.
